New advances in Ms Office malware analysis

Frank Boldewin

Hack.Lu 2009

Agenda

- Introduction to MS Office exploitation
- Some MS Office exploits since 2006
- Short introduction to the OLESS format
- Example of a malicious MS Office document structure
- Typical MS Office Shellcode behavior
- Status Quo to MS Office document analysis
- Introduction to OfficeMalScanner

```
push    Z
call    sub_672B3730
add    eax, eax

mov    ebx, ecx
```

Introduction to MS Office exploitation

- MS Office commonly exploited since 2006
- Existing exploits in the wild exploit unexceptional the older OLESS file format.
- Currently no known bugs in the newer XML based MS Office format.

Some MS Office exploits since 2006

- **CVE-2006-0009 Powerpoint** **MS06-012 (March 2006)**
- **CVE-2006-0022 Powerpoint** **MS06-028 (June 2006)**
- **CVE-2006-2492 Word** **MS06-027 (June 2006)**
- **CVE-2006-3434 Powerpoint** **MS06-062 (October 2006)**
- **CVE-2006-3590 Powerpoint** **MS06-048 (August 2006)**
- **CVE-2006-4534 Word** **MS06-060 (October 2006)**
- **CVE-2006-4694 Powerpoint** **MS06-058 (October 2006)**
- **CVE-2006-5994 Word** **MS07-014 (February 2007)**
- **CVE-2006-6456 Word** **MS07-014 (February 2007)**
- **CVE-2007-0515 Word** **MS07-014 (February 2007)**
- **CVE-2007-0671 Excel** **MS07-015 (February 2007)**
- **CVE-2007-0870 Word** **MS07-024 (May 2007)**
- **CVE-2008-0081 Excel** **MS08-014 (March 2008)**
- **CVE-2008-4841 Word** **MS09-010 (April 2009)**
- **CVE-2009-0238 Excel** **MS09-009 (April 2009)**
- **CVE-2009-0556 Powerpoint** **MS09-017 (May 2009)**

Short introduction to the OLESS format

- OLESS Header
- FAT FS

■ SectorNumbers

■ OLESS directory entries

- Data is divided into directories (storages) and files (streams)

```
push    Z
call    sub_672B3730
add    es
test   eax, eax
jnz    short loc_672B5428
lea    edx, [esp+110h+LibFileName]
push   edx
call   sub_672B35F0
mov    ecx, 0xFFFFFFFF
or     edi, edi
xor    ebx, ebx
repne scasb
not    ecx
sub    esi, edi
mov    ebx, ecx
cmp    edi, edi
jnz    loc_672B5455
lea    ecx, [esp+110h+LibFileName]
push   edx
push   2
call   sub_672B3730
add    eax, eax
test   eax, eax
jnz    short loc_672B5428
lea    edx, [esp+110h+LibFileName]
push   edx
call   sub_672B35F0
mov    edi, off_672CA058
or     ecx, 0xFFFFFFFF
xor    edx, eax
lea    edx, [esp+114h+LibFileName]
repne scasb
not    ecx
sub    edi, ecx
mov    esi, edi
mov    ebx, ecx
```

Short introduction to the OLESS format

- Depending on the application streams may contain
 - Macros
 - Graphics
 - Tables
 - Sounds
 - Animations

```
push    Z
call    sub_672B3730
add    eax, eax
test   jnz loc_672B5428
lea    edx, [esp+110h+LibFileName]
push   edx
call   sub_672B35F0
mov    ecx, 0FFFFFFFFFFh
or    eax, eax
xor    edx, [esp+110h+LibFileName]
repne scasb
not    edx
sub    edi, eax
mov    ebx, ecx
mov    esi, edi
cmp    edx, [esp+110h+LibFileName]
jnz loc_672B5428
lea    edx, [esp+110h+LibFileName]
push   edx
push   edx
push   edx
2
sub_672B3730
esp, 0Ch
eax, eax
short loc_672B5428
edx, [esp+110h+LibFileName]
push   edx
call   sub_672B35F0
edi, off_672CA058
ecx, 0xFFFFFFFFh
eax, eax
edx, [esp+114h+LibFileName]
repne scasb
ecx
edi, ecx
esi, edi
ebx, ecx
```

Short introduction to the OLESS format

- Parsing can be done using the Win32 COM API
 - StgOpenStorage()
 - IStorage methods
 - IStream methods

```
push  
call  
add  
test  
jnz  
lea  
push  
call  
mov  
or  
xor  
lea  
repne sc  
not  
sub  
mov  
mov  
cmp  
jnz  
lea  
push  
push  
push  
call  
add  
test  
jnz  
lea  
push  
call  
mov  
or  
xor  
lea  
repne sc  
not  
sub  
mov  
mov
```

```
esi, edi  
ebx, ecx
```

Example of a malicious MS Office document structure

OLESS HEADER

RECORDS

SHELLCODE

EXECUTABLE

(often encrypted)

HARMLESS DOCUMENT

(e.g. as embedded OLE)

SUMMARY INFORMATION

Typical MS Office Shellcode behavior

- When a bug in a MS Office application gets triggered...
- Shellcode executes
- Finds itself by open file handles enumeration and file size checking
- SetFilePointer to encrypted PE-File(s), decrypt, drop and execute
- Drop harmless embedded MS Office document and start to look innocent

Status Quo to MS Office document analysis

- Not much public information about MS-Office malware analysis available
- Microsoft Office Binary File Format Specification (since Feb. 2008)
- Bruce Dang's talk „Methods for Understanding Targeted Attacks with Office Documents”

Available tools for Ms Office analysis

- **DFView (oldschool Microsoft OLE structure viewer)**
- **Officecat (signature based CLI utility)**
- **FlexHex Editor (OLE compound viewer)**
- **OffVis - (Office binary file format visualization tool)**

```
push    Z
call   sub_672B3730
add    eax, eax
test   eax, eax
jnz    short loc_672B5428
le    
```

INFLATE mode

- Decompresses Ms Office 2007 documents, into a temp dir and marks potentially malicious files.
- Documents with macros included (docm, pptm and xlsm) contain .bin files, usually vbaproject.bin (Old MSOffice format)
- Such files could host malicious macro code and can extracted using the OfficeMalScanner INFO mode.

xor
lea    MalHost-Setup v0.12
repn
not
sub
mov
Usage:
-----
cmp   MalHost-Setup <inputfile> <outputfile> <offset of EP to shellcode in hex> <wait>
jnz
lea   The option <wait> means an execution halt (0xEB 0xFE patch) at shellcode start.
push  Useful if you want to attach a debugger for tracing the shellcode execution.
push  After attaching the debugger you need to repatch the original bytes.
push  The original bytes and the shellcode startaddr will appear on the console.
cal

The screenshot shows the Immunity Debugger interface with the title bar "NormalMode - outfile.exe - [*C.P.U* - main thread]". The menu bar includes File, View, Debug, Plugins, Options, Window, Help. The toolbar has buttons for Paused, Stop, Run, Break, Step, and Registers. The assembly dump window shows assembly code with highlighted instructions like `JMP SHORT 009F5024` and `CALL 009F52FC`. The Registers window shows CPU registers (EAX-EIP) and memory registers (EDX-EBP). The Stack dump window shows the stack contents starting with `9F5024`. A context menu is open over the stack dump area.
